Second World Parliamentary Forum

Declaration regarding Argentina

Saturday 2 February 2002, by [World Parliamentary Forum](#) (Date first published: 2 February 2002).

(Translated from the Spanish).

The World Parliamentary Forum shows its solidarity with argentine people and nation, that since December journeys play the most important role in the popular contestation process against the continuation of new liberal politics. It provoked the aggravation of the economic, political and social crisis.

The argentine engagement to the premises of the new liberal belief and the submission to the demands of the international financial organizations generated an economic recession process with elevated unemployment rates, increase of poverty and social exclusion. It is the clearest demonstration of the new liberalism failure in the Latin America, which politics make the economic growth unavailable, putting in debt our countries and threaten our sovereignty.

Therefor, the World Parlamental Forum declares its support to the argentine people fight, that day after day show on the streets the will of recovering dignity through the citizenship practice in defense of their rights.
