# Global call : antinuclear gathering all over the world on the 20<sup>th</sup> of March !

Saturday 19 March 2011, by [Sortir du nucléaire](#) (Date first published: 18 March 2011).

Dear friends,

Right now, Japan is undergoing the worst nuclear catastrophe since Chernobyl. Four reactors have partially melted down, huge amounts of radioactivity has been released, and a poisonous cloud could spread through Japan and even further.

The catastrophe is not over. In spite of all efforts, the cooling of the reactors cannot be completed successfully. Beside, the poisonous gas released will fall out and remain on the ground and in the water for decades, and even more.

We send a call to all antinuclear groups and all people concerned about this ongoing catastrophe to organize gatherings this Sunday, the 20<sup>th</sup> of March.

To express our solidarity with the Japanese people  
and

To spread the word : nuclear power must be phased out, all over the world !

Some gatherings are already organized in France and Spain.

You can register your gathering here :

<http://groupes.sortirdunucleaire.org/alerte-japon/actions.php>

We will display all the gatherings on Sortir du nucléaire's website.

We have enough with living with the permanent threat of nuclear power ! On Sunday let's make our voices heard at last !

Best regards,

Charlotte Mijeon

Chargée de campagne / Relations extérieures  
Réseau "Sortir du nucléaire"
