

# **Brazil: Call for international mobilization against Jair Bolsonaro and the extreme-right**

Wednesday 26 September 2018, by [Juntas](#). (Date first published: 20 September 2018).

**On September 29<sup>th</sup> we will take the streets worldwide to say: #EleNão #EleNunca (#NotHim , #NeverHim)!**

Dear comrades,

For some years Brazil has been immersed in a deep economic, political and representative crisis. With only two weeks to the election, the trends to reject the establishment parties are stronger, and because of the identification of leftist ideas with the collapsed PT project, many people turned to reactionarism as a way out of the crisis.

Today the one who is leading the polls is Jair Bolsonaro, a protofascist military with an ultraliberal economic program, who has a history of racist, sexist and LGBTphobic statements.

The women are leading the political combat against this figure. A Facebook group named “Mulheres Unidas contra Bolsonaro” [Women United Against Bolsonaro] brought together more than 2.5 million women in just one week and is calling for demonstrations all over Brazil and the world with this slogan for September 29<sup>th</sup>.

Juntas is making a call for all women and organisations in the left who can participate in the demonstrations that have already been scheduled, or reproduce similar events in their countries. We count on your help, which can be by informing about the events in your country, sending photos and videos of support, and using the hashtag # EleNão and #EleNunca . We can do it!

Feminist greetings,

**Coletivo Juntas**
