These are harrowing days for us all. The recent months' events have personally impacted each and every one of us, and nearly all of us have friends, family members, or acquaintances who lost their lives or homes, who were wounded, or who were taken hostage.

Over the final three months of 2023, Physicians for Human Rights Israel (PHRI) encountered every possible aspect of this suffering. We worked tirelessly to provide care and protect the rights of all victims of the October 7 Hamas attacks and Israel's subsequent assault on Gaza.

Today, we're launching our annual activity report for 2023, which includes an overview of our emergency response activities during the final quarter of the year and of the peak moments in our work during the months prior to October 7.
