

Stay Human. Support B'Tselem

Friday 20 December 2024, by [B'Tselem](#) (Date first published: 20 December 2024).

For more than a year, the Israeli government has been crossing every moral red line. In Gaza, tens of thousands have been killed, including countless children, millions displaced, and the population systematically starved. In the West Bank, violent settlers are running rampage with full state backing, furthering the forcible transfer of entire communities. Palestinians are being systemically abused in prisons while Israeli hostages languish, abandoned, in tunnels.

Anyone who dares speak out is silenced. Journalists are only allowed into Gaza escorted by the IDF Spokesperson's Unit, and those reporting from within are killed and their offices bombed. The government has outlawed media outlets and heavily censors what Israelis see.

The truth has become a precious commodity we must fight to protect.

B'Tselem fights injustice by telling the truth and demanding change. We can't do it without you.

The Israeli government has weaponized the trauma of the horrific Hamas attack on October 7 to advance its violent, racist agenda—making the occupation and apartheid regime more fascist, deadly and oppressive than ever before.

We at B'Tselem—Israelis and Palestinians in Gaza, the West Bank, East Jerusalem and within Israel—refuse to be silenced. Every day, we insist on exposing the truth, because we believe that everyone deserves a future of freedom, justice, and equality. We believe in the power of truth.

Support B'Tselem today—for truth, for justice and for our shared values. For staying human.

For 35 years, B'Tselem has worked tirelessly to document reality, investigate human rights violations and publish reliable information and analysis. It is our duty to fight ongoing injustice by speaking out and resisting.

Especially in these challenging times, we turn to you as partners in this vision. If you believe that standing idly by is not an option and we must stop the war and save lives —stand with us. Support our work.

Every gift matters. Every share is a stand against injustice.

Yours,

The team at B'Tselem

Some truths we exposed and fought to change this past year:

We called to end intentional harm to civilians, release the hostages in a deal and reach a ceasefire. We opposed Israel's inhumane starvation policy throughout the Gaza Strip and warned of ethnic cleansing in northern Gaza, urging the international community to act. Our field researchers from Gaza and the West Bank overcame many hardships to collect testimonies and document atrocities in real-time, in order to give an accurate portrayal of events on the ground.

We revealed that Israeli detention facilities have been turned in practice into torture camps for Palestinians. We exposed that soldiers are systematically abusing civilians in the West Bank. We documented the massive military demolition campaign in the northern and central West Bank. We closely monitored the forcible transfer of dozens of communities in the West Bank, who fled their homes due to military and settler violence, while the world focused on Gaza.

We called on states and the international community to uphold the ICC's independence and enforce the arrest warrants issued for PM Netanyahu and former Defense Minister Gallant. We gave the UN Security Council a review of the human rights situation on the ground, of the war crimes Israel is committing and of the brutal war the apartheid and occupation regime is waging against Palestinians on all fronts - in Gaza, in the West Bank, in East Jerusalem and within Israel.
